What is Stretched LCD Display?

XINSENYUE provide innovative stretched LCD displays, also known as Ultra-wide LCD displays, stretched bar LCD and bar type displays. The flexibility display is cutting from regular size large format LCD monitors for 1/2, 1/3, 2/3, 1/4 etc. With less height than traditional LCD displays, stretched displays allow for a variety of installation options, from passenger information display, retail environments to stadiums to fast food restaurants. The ultra-wide aspect ratio is perfect for grabbing your audience's attention, and the high brightness display gives perfect visual performance in a wide variety of applications. Compared to an LED display, LCD requires much less power to operate.

Type

Single Face Stretched LCD

* Wall mount Type

Xiamen Xinsenyue Technology Co.,Ltd

* Open Frame Embedded Type

Double sided Stretched LCD

Professional multiple size ultra wide stretched LCD display
